MaxPosCam

*Your effective plant
navigation system*

MaxPosCam – Your plant navigation system

constant, fast, uniform, unaltered, fully automatic

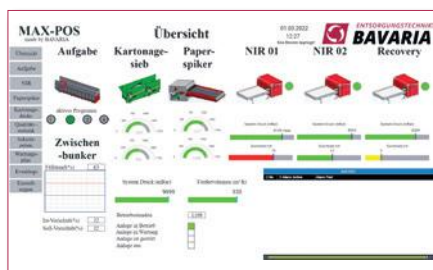

Continuous real-time measurement instead of small random samples

The principle: simple and reliable

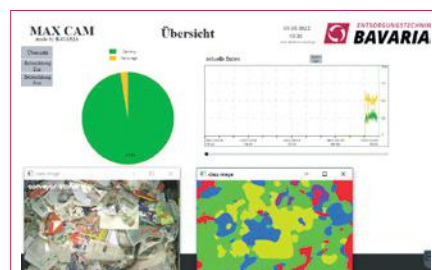

- ✓ Simple hardware (industrial colour cameras, no NIR sensors)
- ✓ Established image analysis algorithms
- ✓ No long learning times = quick to implement
- ✓ Local data evaluation, storage and visualisation (no need for cloud services)
- ✓ Semi-mobile installation possible above the conveyor belt
- ✓ Direct communication with customers possible

Advantages:

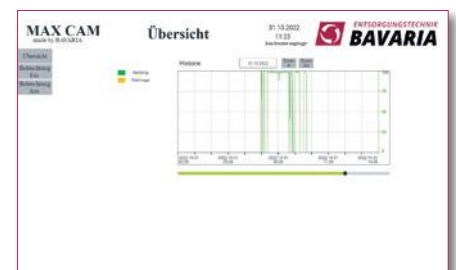

- ✓ Direct information on current quality in input and output
- ✓ Proof of quality in real time
- ✓ Connection to process control system possible
- ✓ Documentation of quality and its fluctuations
- ✓ Improvement of quality
- ✓ Improvement of the efficiency of the sorting plant
- ✓ Reduction of costs
